### DETAILED ACTION

#### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, in lines 1-2, applicant should clarify the specific arrangement intended by "a quenching chamber which is *arranged rotationally symmetrically about a central axis*". It is not clear what is intended by "arranged rotationally" and what the axis is relative to. In line 8, it is not clear what "cover" and "contact making surface" applicant intends. In lines 10-11, applicant should clarify the structure dielectric shielding provided by the "thin film dielectric layer" and the "thin film dielectric layer".

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, as best able to be understood in view of the rejections under 35 U.S.C. 112, second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19613568.

DE 19613568 discloses a contact zone [figures 1 & 2] of a quenching chamber comprising:

- at least two stationary consumable contacts [9] in the form of contact rings;
- insulating covers [36] partially covering the consumable contacts, held in place by a "bead"

[figure 2], wherein the leading edge of the contact-making edge of the stationary cover is shielded.

***Allowable Subject Matter***

6. Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure
